

# Brand Guidelines

FEBRUARY 2023

- 1.0 Logo**
- 2.0 Colour**
- 3.0 Typography**
- 4.0 Graphic Devices**
- 5.0 Imagery**
- 6.0 Brand in use**

# 1.0 Logo

## 1.1

### Logo

The logo can be used in two different orientations, horizontal or stacked. The preference horizontal, but in certain situations for brand awareness such as event banners the stacked version may be used. The logo must be used with the registered mark at all times unless when used small it becomes illegible for which case you can remove.

HORIZONTAL

STACKED

## 1.2 Primary colour logo options

Our preferred logo is available in three color formats for different applications.

Electric blue and white on deep blue

Electric blue and deep blue on white

Deep blue on electric blue

## 1.3 Monochrome options

Where the primary colour options can not be used, there are 2 colour monochrome versions.

White on a dark background

Black on a light background

## 1.4 Logo clear space

When using the logo, please include an exclusion zone (clear space). There should be no other elements placed within this zone. This includes text and graphics. The clear space around the logo should be  $1/2 N$ .

The minimum sizes of the logo set a baseline standard for the scaling of the logo in both print and digital applications. While the logo may be sized larger than shown here, it is important that it never appears smaller as this will significantly impair legibility and brand recognition.

### MINIMUM SIZE

## 1.5 Logo misuse

The New Motions Labs logo is provided in a range of color and file formats for all applications. No modifications are necessary. Please review the following examples to ensure it is used properly.

Do not alter the colour.

Do not change the transparency.

Do not distort the logo.

Do not add effects to the logo.

Do not outline the logo.

Do not rotate any part of the logo.

Do not change the sizing of the N.

Do not alter the text.

Do not place on a busy background.

## 1.6

### Tagline lockup

In some instances, you'll want the logo to appear along with the tagline. Such as the first slide of a presentation or a roll up banner at an event. Please note you must not change or alter the text in any way. The stacked NML logo should not be used with the tagline only the horizontal.

**Performance: Engineered Drivetrain**

## 1.7

### Secondary lockup

The secondary lockup is used only for internal-facing entities that contribute to our employee experience. These are programs, tools, events and groups with the highest potential for internal visibility and adoption.

We lock up the brandmark with the entity name. The name should appear in case setence, Poppins Semi Bold. The entity name is set to the right of the brandmark 1/4 equal to N.

## 1.8 Partnership lockup

The partnership lockup is used for communication around approved New Motion Labs partnerships.

We lock up the NML logo with a partner logo, placing the NML logo either to the left or top of the partner's logo. We add clear space between the logos, and divide this space in half by a vertical line.

Both logos should feel of equal size. Use either both sets of full colour logos or if not possible use a one colour version for both.

## 1.9 Enduo primary colour logo options

With Enduo™ technology, everything changes – unmovable fundamentals collapse, enabling the manufacturing of new products with unparalleled strength, power, speed, efficiency, lifetime, and sustainability.

On the right are application examples for Enduo which is forever growing. When designing marketing material for each application, be sure to keep to each of the colours outlined in the following section.

Electric blue and white on deep blue

Electric blue and deep blue on white

Deep blue on electric blue

## 1.10 Enduo monochrome options

Where the primary colour options can not be used, there are 2 colour monochrome versions.

White on a dark background

Black on a light background

## 1.11

### Tagline lockup

In some instances, you'll want the logo to appear along with the tagline. Such as the first slide of a presentation or a roll up banner at an event. Please note you must not change or alter the text in any way. There are different colour options available in the assets folder on the server.

**ENDUO**<sup>TM</sup>

**BECAUSE PERFORMANCE  
SHOULDN'T COST THE EARTH.**

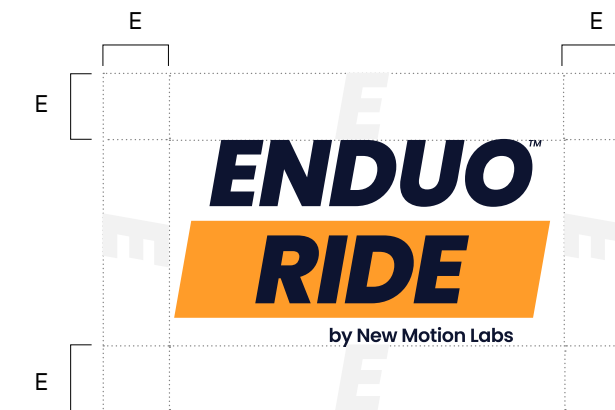

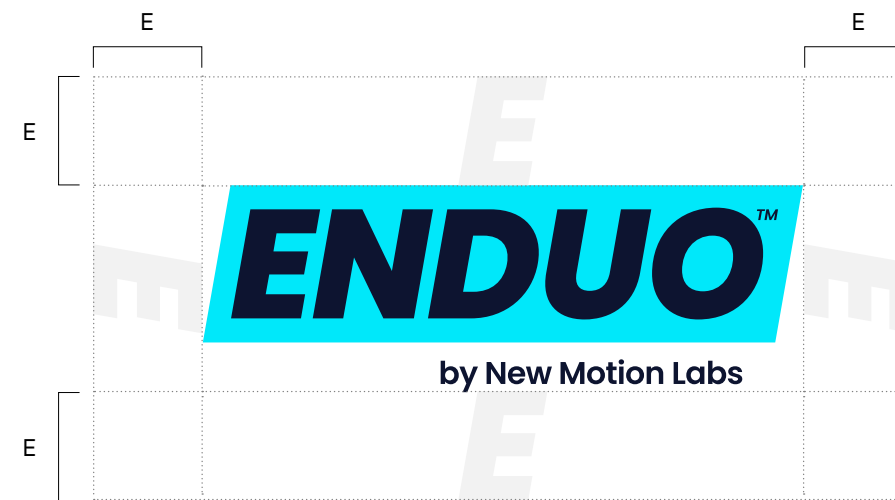

## 1.12

### Enduo clear space

When using the Enduo logo, please include an exclusion zone (clear space). There should be no other elements placed within this zone. This includes text and graphics. The clear space around the logo should be E for the Enduo logo and 2x E for Enduo application logos.

The minimum sizes of the logo set a baseline standard for the scaling of the logo in both print and digital applications. While the logo may be sized larger than shown here, it is important that it never appears smaller as this will significantly impair legibility and brand recognition.

#### MINIMUM SIZE

4CM / 90PX

## 1.15 Enduo logo placement

The placement of the Enduo and Enduo application logo's in compositions are flexible. It should anchor where possible one one of the corners, but where not possible it can be aligned vertically centred as shown.

Primary Enduo and Enduo  
application logo placement

Secondary Enduo and Enduo

# 2.0 Colour

## 2.1 Our primary colour palette

The primary colour palette for the New Motion Labs brand is electric blue, deep blue, black and white. This creates a strong system which prioritizes simplicity and clarity of communication while nodding to the legacy of the NML brand.

Electric blue and deep blue are the colours that holds most brand equity and which current customers associate with the brand and should be used.

## 2.2 Our secondary colour palette

Our secondary colour palette may be used for product differentiation. NML green for Enduo Cargo, NML yellow for Enduo Track. The primary NML electric blue however is used for Enduo E-Bikes.

## 2.3 Color combinations

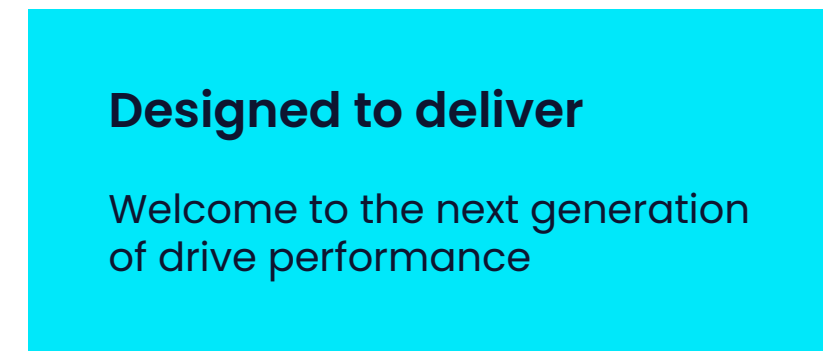

All examples shown on the right pass contrast standards. Do not mix any other colour combinations when typesetting as legibility and accessibility will be limited.

3.0

Typography

## 3.1

### Our typography

Poppins is our primary font which is geometric with a fun, relatable attitude. It comprises around corners and elegant curves.

Clean, and almost monolinear, Poppins has 9 weights for a total of 18 font styles. This ranges from Thin, Thin Italic, Extra Light, to Regular, Black Italic, and Extra Bold.

DM Mono our secondary font used for technical drawings and captions.

#### Note

Helvetica, Courier (Mac) and Arial, Courier (PC) may be used as an alternate typeface when Poppins and DM Mono is unavailable, for use within word processing, spreadsheets, and presentation programs. Common usage includes: letters, labels, memos, invoices, forms, binders, emails and PowerPoint presentations.

## 3.2

## Typography hierachy

With the use of varying text size, weight and style we can create a clear and consistent visual hierarchy, assisting in guiding the reader through our messaging, while maintaining a sense of clarity and structure.

Avoid mixing too many type styles and sizes together as this will create visual clutter and make the message less effective.

# 4.0 Graphic Devices

## 4.1

### New Motion Labs brandmark

You may use the New Motion Labs N brandmark on it's own in specific situations where the intended use it to be displayed very small such as favicons and social profile pics. The full logo should still be used in most situations. It can also be used as a decorative element in addition to the logo.

SQUARE FORMAT

CIRCLE FORMAT

FAVICON

## 4.2

### Iconography

There is a set of iconography which can be used on light or dark background. Each colour can also be changed to our secondary colour palette when referring to that particular product offering.

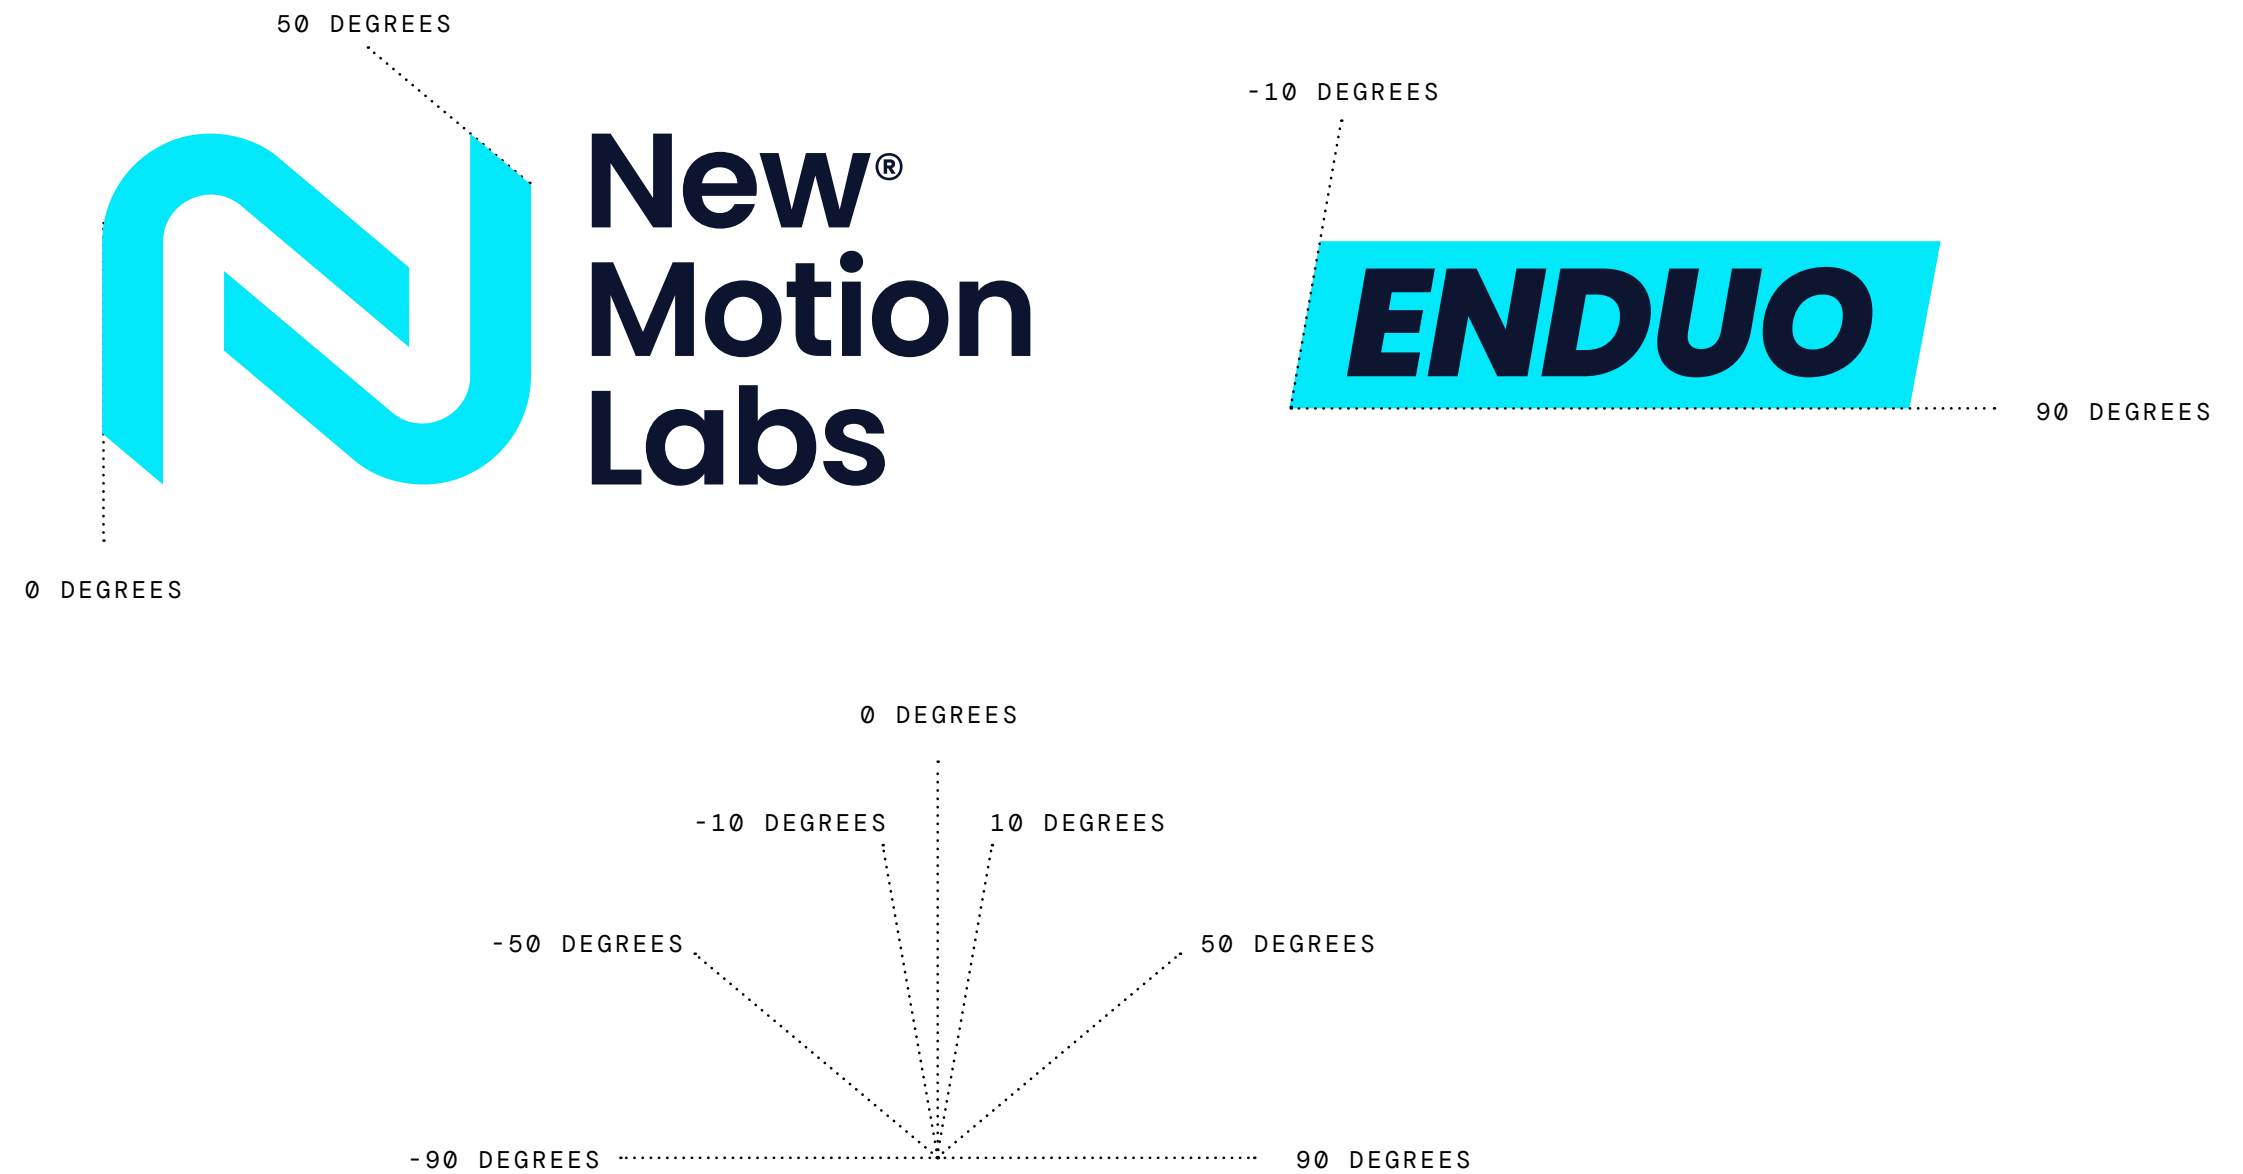

## 4.3 Patterns

These patterns can be used in a variety of applications and colour ways. It can be overlaid on images or used as graphic shape masks. The pattern can be rotated -90, 90 or 180 degrees. The strokes can also be used with white if desired, while the colour may be changed to our secondary colour palette if desired.

## 4.4 Angles

The following angles may be used for graphic shapes which are taken from our innovation and technology logos.

## 4.5 Graphic Shapes

We have a variety of graphic shapes which can be used in a variety of ways. All can be rotated -90, 90 or 180 degrees and used as outlines

# 5.0 Imagery

## 5.1 Photography

Our photography is clear, simple with uncluttered backgrounds.

## 5.2 Photography duotone

For bigger brand presence or variation in our marketing material we can apply a duotone filter to our images. We do this by adding a Gradient Map in Adobe Photoshop going from the deep blue for the dark tones to our primary blue or secondary highlight colours for the lighter tones.

## 5.3 Photography gradient

A gradient over part of the photography may also be used giving more flexibility for marketing material. This may be our primary blue, deep blue or secondary highlight colours.

NML YELLOW

## 5.4 Photography legibility

To improve legibility for text or graphics, you can apply a deep blue, primary or secondary colour with an opacity between 10 and 90%.
